## Authorized Summary for the BESA long term-project P71 4.1 Leela Quantum H.E.A.L.-Capsule

The BioEnergetic System Analysis (BESA) tests carried out by IFVBESA on the energetic and physical effectiveness of the "Leela Quantum H.E.A.L.-Capsule" have clearly shown that this product neutralizes or harmonizes the biologically significant stress factors from the imprints (beliefs) in the meridians or at the acupuncture points of the test persons after a long-term application of at least 5 months. Throughout the study, each test person wore a "Leela Quantum H.E.A.L.-Capsule" for about 12-14 hours during the day. Using BESA, the effect of the mentioned stress factors on the test persons, their energy systems and their biological control circuits was questioned and systemically tested on the energetic level. The BESA BEFORE & AFTER results show significant changes at the tested acupuncture points on the meridian system of the test persons. The measurement data and key figures confirm the stress effects of the tested imprints on the human organism. The data also impressively confirms that the application of the "Leela Quantum H.E.A.L.-Capsule" causes the deregulating energies to be transformed into body-immanent and biocompatible energies. All measured values improved significantly from the mostly 100-percent blue measuring range to the green mostly 50-second range (scale value), i.e. the range of optimal measured values. This means that an optimal regulation dynamic has taken place. From a holistic point of view, it could be assumed that the positive effect observed in the test persons also occurs in other people.

**Result:** During the BESA BEFORE & AFTER testing, the test persons were exposed to severely stressful imprints for a period of at least 5 months. In contrast to the BEFORE testing, in which the "Leela Quantum H.E.A.L.-Capsule" was not used, after the product was used for at least 5 months consistently positive measurements were recorded. This indicates that neutralization or harmonization of 85% to 98% of the tested imprints had taken place. The regulation dynamics developed into an optimal effective range.

By proving the energetic effectiveness of the "Leela Quantum H.E.A.L.-Capsule" in the long-term project P71 4.1, the requirements for obtaining a BESA seal of approval with 5 stars were confirmed by the International Professional Association for BESA.
