

RESEARCH PARTNERS

Emoto Institute, Japan

masaru-emoto.net

The EMOTO Institute builds on the pioneering work of Dr. Masaru Emoto, whose research explored the relationship between water and human consciousness. Today, the institute continues advancing this field, investigating how water responds to intention, environment, and energetic influence.

Biostrap, USA

biostrap.com

Biostrap is a research-grade biometric platform trusted by universities, clinics, and healthcare professionals. Its configurable wearable system provides high-fidelity physiological data, cloud analytics, and AI-driven insights used in clinical studies and performance research.

GlycanAge

glycanage.com

GlycanAge is a leading biological age testing platform that measures chronic inflammation through glycans—immune-regulating biomarkers. Their research helps quantify how lifestyle, wellness practices, and interventions influence long-term health.

Versea Health, USA

versea.com

Verséa Health is a healthcare innovation company specializing in high-value diagnostic and therapeutic solutions. Their research-driven approach supports early detection, clinical decision-making, and improved patient outcomes across a wide range of conditions.

BESA Institute, Austria

besa.de

The BESA Institute is Europe's leading center for biofeedback and bioenergetic analysis. Through measurable bioenergetic testing, BESA evaluates how various products influence human health and wellbeing, awarding recognition to those that demonstrate beneficial effects.

**The International Association
for Electromog-Research
(IGEF)**

elektrosmog.com

IGEF is an independent global research body studying the biological effects of EMF exposure since 1990. Their scientific advisory board evaluates technologies, products, and environments according to the ALARA principle, issuing certifications based on rigorous, documented assessments.

IGEF evaluates products and systems for their EMF-protective properties. Certified products meet strict criteria set by the Scientific Advisory Board and are supported by detailed expert assessments.

RESEARCH PARTNERS

OHM CENTER 

Ohm Center

ohmcenter.com

The OHM Center conducts experiential research in meditation, sound healing, and consciousness studies. Their work explores how sound, vibration, and mindfulness practices support emotional resilience, clarity, and personal development.

MuLabs

mulabs.tech

MuLabs is a Portuguese neurotechnology studio transforming real-time brain activity into interactive experiences that deepen self-awareness, creativity, and well-being. Blending neuroscience with immersive media and design, they're pioneering new ways for people to access and understand their own consciousness.

Reputable Health

reputable.health

Reputable Health is a transparent research platform that validates wellness products through real-world data. Using wearable tech and AI to capture over 20,000 daily biomarkers per participant, they provide brands with measurable, regulatory-grade insights and outcomes—turning wellness missions into proven results.
